NO TEXTING AND DRIVING PLEDGE

I value my life and the lives of others and understand that text messaging while driving is dangerous.

I acknowledge that:

- More than 3,000 teens die each year as the result of texting while driving (2013 Cohen Children's Medical Center)
- Text messaging creates a crash risk 23 times greater than driving while not distracted (Va. Tech Transportation Institute)
- 49% of drivers with cell phones 35 years old and younger send or read text messages while driving (2011 Harris Poll)
- 71% of teens and young adults say they have composed or sent messages while driving (2012 Ad Council)
- Taking my eyes off the road for more than two seconds doubles my risk of a crash (AAA)

No text message is more important than my safety, the safety of my passengers and the safety of others who could be injured or killed by my reading or sending a text while behind the wheel.

I pledge to never text while driving my Mitsubishi from Interstate Mitsubishi.
