NEW FOR 2020

KUHN MERGE MAXX

Discover another way to rake with the MERGE MAXX belt merger. With this new raking concept, it's possible to work at a higher speeds without impairing the quality of the forage, this is done by physically lifting the forage and moving it, rather than scraping the ground with tines, mud and stones are left out of the perfectly formed windrow giving the forager an easier life too!

VÄDERSTAD CROSSCUTTER DISCS

Väderstad CrossCutter Disc opens up extended possibilities for effective tillage and improved field results in a wide range of conditions. CrossCutter Disc performs outstanding in oilseed rape stubble and in cover crops, while also enabling great advantages in grain stubble and on ploughed land. CrossCutter Disc works very intensively

HONDA FOREMAN 520

The new 520 runs a 518cc engine – up from its predecessor's 475cc – that delivers 4% more torque at low-ish engine speeds to provide marginally punchier acceleration and better pulling power. Output, is around 30hp, which can look underpowered compared with rivals (some of which pack 40hp or more) because the Foreman's mechanical transmission tends to be far more efficient than belt-driven equivalents.

HONDA
